Hardly TECHNICAL, but here is a description of a simple medical test ruler..

<table>
<thead>
<tr>
<th>Time (mS)</th>
<th>100</th>
<th>110</th>
<th>120</th>
<th>130</th>
<th>140</th>
<th>150</th>
<th>160</th>
<th>170</th>
<th>180</th>
<th>190</th>
<th>200</th>
<th>210</th>
<th>220</th>
<th>230</th>
<th>240</th>
<th>250</th>
</tr>
</thead>
<tbody>
<tr>
<td>Distance (MM)</td>
<td>50</td>
<td>60½</td>
<td>72½</td>
<td>85</td>
<td>97½</td>
<td>112</td>
<td>128</td>
<td>144</td>
<td>161</td>
<td>180</td>
<td>198</td>
<td>219</td>
<td>240</td>
<td>263</td>
<td>286</td>
<td>312</td>
</tr>
</tbody>
</table>

RULER

INCHES

- Tester hold top & releases when testee least suspects.
- Testee has finger & thumb ready to grab bottom.

Ideally the testee should not be able to see the tester, so there are no clues when the release is to take place.

Anything below 150mS is usually considered cheating in sports.
Anything over 250mS & you are dead.

It assumes G = 9.81N/M/M, e.g. you are on the Earth.

N.B. YOU CAN'T TEST YOURSELF!

Why Don't U send an interesting bul?
